Summary

Front-end engineer with 1.5 years of experience building scalable web applications with React, TypeScript, and modern UI practices. Skilled in component-based architecture, API integration, and creating scalable, maintainable code.

Work Experience

Sira Aug 2025
Front-end Engineer Remote

- I built an admin panel using html, CSS, bootstrap5, JavaScript and Express for the Sira mobile application.
- I implemented reusable components that reduced front-end development time by 30%.
- I collaborated with a front-end team of 3 developers, providing technical guidance, task assignments, and code reviews, which accelerated feature delivery and improved code quality.
- With my help as the lead front-end developer, my team and I were able to deliver a responsive, user-friendly admin interface that enabled faster onboarding of new features.
- I worked closely with backend and product teams to align UI functionality, ensuring project requirements were met, resulting in reduced integration errors by 25%.
- I created and documented a scalable routing structure to ensure clean navigation and dynamic page loading.
- I improved code quality and maintainability by setting standards for structure, naming, and component organization, improving team productivity and reducing bug rates in front-end modules by 20%.

Boscotti May 2025
Front-end Engineer Remote

- I built an e-commerce front-end website using React, showcasing product listing, details page and shopping cart UI which improved user engagement by 25%.
- I created a search and filter functionality to allow users to easily browse products by category, price, or attributes, reducing product discovery time by 40%.
- I designed and implemented routing with React Router for seamless navigation between pages.
- I used Context API for state management to handle cart, user selections, and product data efficiently, reducing state-related bugs by 20%.
- I developed reusable components such as buttons, cards, product listings to maintain consistency and follow best code practices.
- I applied responsive design principles to ensure optimal display on desktop, tablet, and mobile devices, resulting in a consistent user experience across platforms.

Client Project Dec 2024
Freelance Front-end Developer Remote

- I designed and built a fully functional, responsive website tailored to the client's branding, increasing the client's online engagement and user retention by 30%.
- I developed the entire front-end using html, CSS, JavaScript and modern UI practice

Skills

Languages: JavaScript | TypeScript | HTML | CSS

Technologies: React | Next JS | GitHub | Node JS | Redux | Jest | Tailwind |

Interest: Web performance | Software architecture | Software Design | Front-end Security | State Management Patterns.

Education

Havard cs50 AI with python (in View)
NIIT python certificate 2024
NIIT data analysis certificate 2025
NIIT web dev certificate (in View)
BEng Micheal Okpara University 2015-2022
